

Contiguous Read Length Distribution Report

The Contiguous Read Length (CRL) is the longest uninterrupted stretch of bases with quality higher than a specified limit. In the evaluation of the quality of each base, not only the quality value of that base is used, but also those of adjacent bases within a specified window size.

Contiguous Read Length : N = 51, Range = 799 - 866, Median = 830, Mean = 830, StandardDev = 20
